

# Business Administration studies: Grants for Academic Excellence

## The UIC is committed to excellence

The Universitat Internacional de Catalunya (UIC) has set up a study grant programme for students with excellent academic results (Talent and Effort), based on its commitment to contribute to the resolution of specific needs in society.

The grants cover 80 % of the enrolment fees for every academic year throughout their degree programme. The total cost therefore becomes around €1.900/year, which is similar to what students normally pay in state universities. This grant is compatible with the discount the UIC already provides for large families.

The grant programme is supported financially by a grant fund held by the Fundació Familiar Catalana (Catalan Family Foundation). For this edition (during the 2014-2015 academic year), grants will be offered to Business Administration (ADE) students. The aim of the programme, therefore, is to contribute in a positive way in an economic climate which demands both entrepreneurial and innovative skills, as well as more job opportunities. In fact, the specific qualities of a good entrepreneur (technical knowledge, social sensitivity, interpersonal skills, etc.) are also the defining features of Business Administration Studies in the UIC.
