Tuition Fee 800€		**Credits** 2	

The **Advanced Online Diploma in Paediatric Dentistry** is designed for dental professionals looking to expand their expertise and enhance their clinical skills in the comprehensive management of paediatric patients, including complex cases and children with special healthcare needs.

The programme offers an up-to-date, evidence-based approach to paediatric dentistry, covering early oral healthcare from the perinatal period through infancy, with a particular emphasis on prevention, functional development, and airway-related conditions.

Participants will gain valuable insights into minimally invasive dentistry and the management of developmental conditions such as Molar-Incisor Hypomineralization (MIH). Advanced pulp therapies in young permanent teeth with open and closed apices are also a key focus, equipping clinicians with the knowledge to support long-term tooth preservation and optimise treatment outcomes.

The curriculum further explores conscious sedation, pharmacology, oral pathology, and paediatric oral surgery, providing participants with the knowledge and clinical perspectives needed to manage anxiety, pain, and complex treatments safely and effectively.

By combining the latest scientific evidence with a practical, clinically oriented approach, this diploma empowers dental professionals to refine their expertise, strengthen their clinical decision-making, and deliver high-quality, patient-centred care in advanced paediatric dentistry.

The course does not involve research activities, clinical trials, technical experimentation, or any processes requiring ethical approval, specific biosecurity measures, or additional insurance coverage.

The programme falls exclusively within the scope of standard teaching and training activities.

*La Facultad de Odontología de UIC Barcelona es la **primera y única universidad española** acreditada por la American Dental Association para la Formación Continua:*

TARGET

This Advanced Online Diploma in Paediatric Dentistry is designed for dental professionals seeking to enhance or update their expertise in paediatric dentistry through a flexible, high-quality online learning experience that fits their professional commitments.

MODE OF DELIVERY

Ten weekly online seminars will take place from April to June. The seminar schedule will be provided to students at the beginning of the programme. Each session will remain available on the platform for up to 7 days after it takes place.

ASSESSMENT METHOD

An online self-assessment test will be carried out at the end of the course so that students can assess the achievement of their personal goals and their knowledge of the content of the course.

Responsible Department
Paediatric dentistry
Faculty of Dentistry

Course Coordinators
Dr Francisco Guinot
Dra. Maria Chiara Cappiello

Instructors
Dra. Maria Chiara Cappiello
Dra. Maria Carmela Giovannelli

*The coordinators and lecturers have no financial ties to any companies that would pose a conflict of interest with the course.

COURSE PROGRAMME: ONLINE SEMINARS

The programme is divided into theoretical modules (10 weekly online seminars).

1. Perinatal and infant oral health care
2. Functional aspects and airway-related problems in paediatric dentistry
3. Minimally invasive paediatric dentistry
4. Paediatric restorative dentistry: anterior aesthetic restorations in paediatric dentistry
5. Pulp treatments in young permanent teeth with open apex
6. Pulp treatments in young permanent teeth with closed apex
7. Molar-Incisor Hypomineralization
8. Conscious sedation in paediatric dentistry
9. Pharmacology and oral pathology in paediatric dentistry
10. Paediatric oral surgery
