

Student society focused on environmental sustainability

A student society, founded and run by students for students, with a focus on environmental conservation and climate issues, through the following student-led academic congresses:

CEBUIC 2025 – Biomedical Students’ Congress (Sant Cugat Campus, 8–10 July 2025)

- Fully organised by undergraduate students from the Bachelor’s Degree in Biomedical Sciences.
- It features activities connecting environmental issues and human health, including a lecture on how air pollution affects cardiac arrhythmias (Dr Antonio Rodríguez).
- Created by students for students and intended to raise awareness and encourage reflection on environmental challenges from a scientific perspective.
