It should also be noted that, in addition, we have more than 50 agreements with specialized Pediatric Physiotherapy centers located in different autonomous communities, as well as in Catalonia. These are used on a more occasional basis, since students are offered the possibility of completing their placements near their place of residence.

Our students come from a wide range of backgrounds, both nationally and internationally, which explains the number of agreements that have been specifically established for students who have needed them.

There is also ongoing flexibility to establish new agreements and to make use of all existing ones, depending on students' needs.
