<p>Tuition fee € 750</p>	<p>Tuesday, from 9 to 11 p.m. (Spanish time)</p>	<p>Mode of delivery Online</p>	
		<p>Credits 2</p>	

Dentistry professionals are increasingly aware of the importance of Paediatric Dentistry. This specialty focuses on the care and treatment of children's teeth from infancy to adolescence.

Knowledge of Paediatric Dentistry is essential for any dentist. It ensures proper care for primary teeth and supports the healthy development of permanent teeth.

Primary teeth are critical not only for proper chewing, speech development, and aesthetics. They also play a key role in maintaining space for the arrival of permanent teeth. The health of primary dentition is crucial in ensuring a smooth transition to permanent dentition, free from complications.

Paediatric Dentistry also involves managing dental trauma and addressing child-specific dental diseases. Early intervention in primary dentition can prevent complex dental issues later, contributing to better overall health and quality of life for children.

Furthermore, behaviour management is a fundamental aspect of Paediatric Dentistry. This area is designed to equip professionals with the knowledge and skills required to address the specific needs of children effectively.

WHY ENROLL IN THIS COURSE?

- The Online Diploma in Paediatric Dentistry will provide updated knowledge, techniques, and protocols in line with the latest trends in this specialty.
- Students will gain the evidence-based knowledge necessary to treat paediatric patients in the dental chair.
- At the end of the course you will be able to plan an appropriate preventive and therapeutic plan for paediatric patients.
- You'll gain the skills to effectively manage the behavior of both cooperative and non-cooperative children.

The **Faculty of Dentistry at UIC Barcelona** is the first and only Spanish university accredited by the **American Dental Association** as provider for Continuing Education.

ADA C.E.R.P.® | Continuing Education Recognition Program

Universitat Internacional de Catalunya, Fundació Privada is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at CCEPR. ada.org.

TARGET

This course is essential for any dentist who wishes to specialise in or update their expertise in Paediatric Dentistry. Through a comprehensive, evidence-based approach, it prepares students to deliver high-quality dental care to children.

MODE OF DELIVERY

The program is structured around theoretical modules delivered as online seminars.

Over the course of ten weekly online seminars held from January to March, participants will explore key areas such as prevention, dental procedures, dental trauma, and behavior management in pediatric patients.

ASSESSMENT METHOD

An online self-assessment test will be carried out at the end of the course so that students can assess the achievement of their personal goals and their knowledge of the content of the course.

The health of primary dentition is crucial in ensuring a smooth transition to permanent dentition, free from complications.

Responsible Department

Paediatric Dentistry
Faculty of Dentistry

Course Coordinator

Dr Francisco Guinot

Instructor

D Maria Chiara Cappiello

Paediatric Dentist; Degree in Dentistry and Dental Prosthetics (University of Bologna) and Master's Degree in Comprehensive and Hospital-Based Paediatric Dentistry (Universitat Internacional de Catalunya - UIC)

COURSE PROGRAMME: ONLINE SEMINARS

Ten online seminars held weekly from January to March (students will be informed of the conference schedule at the beginning of the course).

These sessions will cover areas including prevention, dental procedures, dental trauma, and behaviour management in paediatric patients.

The seminars will be available on the platform for a maximum of 7 days after the session.
